# VCAT's Response to NIST 2008 Priorities

Jim Serum  
June 10, 2008

# Feedback on 2008 Priorities

- ❑ Questions being asked in the 2008 Priorities are relevant and appropriate
- ❑ How does VCAT continue to support past momentum gained in Bioscience, IT and Nanotechnology?
- ❑ What kind of VCAT organizational structure is appropriate to effectively “advise” NIST on addressing 2008 Priorities?
- ❑ How can VCAT assist NIST management and organization in “strategic planning” content and process?
- ❑ What “novel” technologies are most important and how does VCAT help to choose focus?
